

Special Issue

Preparation, Characterization, and Application of Carbon Nanocomposites

Message from the Guest Editor

This Special Issue on “Preparation, Characterization, and Application of Carbon Nanocomposites” seeks high-quality works that address the latest advancements in this field. Topics include, but are not limited to, the following:

- Innovative synthesis and functionalization methods;
- Scalable synthesis of carbon nanocomposites from renewable resources;
- Advanced characterization techniques for structural and compositional analysis;
- Applications in energy storage, catalysis, environmental, and biomedical solutions;
- Applications in electronics, photonics, and smart devices;
- Other emerging applications and technologies in carbon nanocomposites with global perspectives.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
