

Special Issue

Application of Deep Learning in Pharmaceutical Manufacturing

Message from the Guest Editors

This Special Issue on “Application of Deep Learning in Pharmaceutical Manufacturing” seeks high-quality papers focusing on the most recent advances in deep learning and their applications in drug product manufacturing. Topics include, but are not limited to:

- Design of pharmaceutical formulation;
- Prediction of physicochemical properties of drug products;
- Design of innovative nanomedicine technologies and drug delivery systems;
- Product quality control;
- Process development and design of new manufacturing technologies;
- Process monitoring and control;
- Continuous manufacturing;
- Use of innovative deep learning architectures for product design or process investigation.

We hope you consider participating in this Special Issue.

Guest Editors

Prof. Dr. Roberto Pisano

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
