

Special Issue

Pharmaceutical Potential and Application Research of Natural Products

Message from the Guest Editors

Natural products have always been the focus of attention in developing new drugs that can be applied in current medicine. However, new processes for obtaining these metabolites are constantly required. This Special Issue aims to address the development of processes for obtaining metabolites of natural origin and the development of chemical-pharmaceutical products, ensuring that the final products meet the market's needs in industries such as chemicals, food, pharmaceuticals, cosmetics, and others. This development is essential to ensure that finished products are efficient, safe, and economically viable. Topics include, but are not limited to:

- Optimization of processing to obtain high yields of secondary metabolites in extracts.
- Use of techniques to assess the compatibility of natural products in pharmaceutical formulations.
- Green processes for obtaining extracts and isolating new molecules.
- Optimization of pharmaceutical processing and extraction through mathematical calculations.

Guest Editors

Dr. Douglas Siqueira de Almeida Chaves
Prof. Dr. Gerardo Fernández Barbero
Prof. Dr. Valdir Florencio Da Veiga Junior

Deadline for manuscript submissions

10 July 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
