

Special Issue

New Research on Oil and Gas Equipment and Technology

Message from the Guest Editors

In recent years, breakthroughs have been reached in oil and gas equipment and technology, which have promoted the quality and efficiency of the exploration, development, storage, and transportation of oil and gas. To meet the requirements of low cost, long service life, and high efficiency, the technological progress of oil and gas equipment still faces great challenges. Innovative research on oil and gas equipment and technology can contribute to solving the current challenges. This Special Issue on “New Research on Oil and Gas Equipment and Technology” seeks high-quality works that focus on the latest novel advances in the design, modeling, analysis, and evaluation of oil and gas equipment. Topics include, but are not limited to, the following:

- Design and optimization;
- Process and safety;
- Failure analysis;
- Fatigue and life;
- Structural reliability;
- Vibration;
- Rock-breaking tool and technology;
- Corrosion;
- Detection and monitoring;
- Offshore petroleum engineering;
- New technology.

Guest Editors

Prof. Dr. Zhiqiang Huang

Prof. Dr. Mingjiang Shi

Dr. Gang Li

Dr. Zhen Chen

Dr. Yachao Ma

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
