Oil Shale Mining and Processing

Message from the Guest Editors

Oil shale is a significant unconventional oil and gas resource, crucial for diversifying energy supply and enhancing energy security. Research in its mining and processing not only drives the integration of multiple disciplines like geology, chemical engineering, and materials science but also spurs innovation in these fields. Oil shale mining and processing research is vital for energy security and disciplinary development. With ongoing technological advancements, this field is poised to achieve greater efficiency, environmental sustainability, and intelligent operations, contributing significantly to global sustainable energy development.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
