

Special Issue

Process Control Technologies and Their Applications in Industry

Message from the Guest Editor

Advanced control technologies have revolutionized several industrial sectors by enabling enhanced process optimization, increased efficiency, and improved product quality. This Special Issue delves into the latest developments in advanced control technologies and their wide-ranging applications in different industries. This field encompasses a diverse range of methodologies, from model predictive control (MPC) and adaptive control to advanced optimization algorithms and machine learning-based control systems. Overall, the goal of this Special Issue is to showcase the latest advancements in control technologies and their diverse applications across different industries. Whether your research focuses on model predictive control, adaptive control, optimization algorithms, or machine learning-based control systems, we encourage you to share your valuable insights and findings.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
