

Special Issue

Advances in Research on the Corrosion Properties of Metal Compounds in Alloys

Message from the Guest Editors

This Special Issue will present research that deepens scientific understanding of corrosion phenomena in metal alloys and compounds. Contributions that address experimental, theoretical, and simulatory aspects of corrosion in various alloy systems are particularly encouraged. In addition, interdisciplinary studies that integrate materials science, surface engineering, electrochemistry, and computational modeling are highly welcome. Topics of interest include, but are not limited to, the following:

- The corrosion behavior of high-entropy, refractory, and lightweight metal alloys.
- The influence of alloying elements and microstructure on corrosion resistance.
- Passivation, localized corrosion, and pitting mechanisms.
- Oxidation and high-temperature corrosion phenomena.
- Surface treatments, coatings, and corrosion-resistant layers.
- The electrochemical characterization of corrosion processes.
- Computational modeling, machine learning, and data-driven corrosion prediction.
- Corrosion behavior in extreme environments (e.g., marine, high-temperature, and nuclear environments).
- Life prediction and analysis of failure due to corrosion.
- Novel testing methods and in situ/operando characterization techniques.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
