

## Special Issue

# New Advances in Green Extraction Technology for Natural Products

### Message from the Guest Editors

Green and sustainable extraction techniques are being intensively developed nowadays to replace or reduce the conventional, environmentally unfriendly, solvent-based techniques. Some of the major industries, such as the food, pharmaceutical, cosmetic and agricultural industries, are increasingly using extracts from natural products and/or their specific metabolites. At least 50% of the energy consumption in industrial processes is related to the extraction cycle, meaning that the implementation of new and optimization of existing extraction methods are important economic and environmental factors. In most cases, the application of green extraction techniques leads to an increase in the extraction yield of the target metabolites, as well as differences in the chemical composition of the isolated natural products. This Special Issue on “New Advances in Green Extraction Technology of Natural Products” will present new research advances in green extraction technologies that lead to improved extraction reproducibility, higher extraction yields, reduced energy, and solvent consumption. We hope you will consider participating in this Special Issue.

### Guest Editors

Dr. Marijana Popović

Dr. Maja Veršić Bratinčević

Dr. Ivana Generalić Mekinić

Dr. Danijela Skroza

### Deadline for manuscript submissions

closed (30 April 2025)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
