Photocatalytic Processes for Organic Pollutants: Advanced Applications and Perspectives

Message from the Guest Editor

This Special Issue, "Photocatalytic Processes for Organic Pollutants: Advanced Applications and Perspectives", aims to provide a comprehensive understanding of the current status and prospects of this field. Research related to the photocatalytic degradation of organic pollutants is welcome. Topics of interest include, but are not limited to:

- Photocatalyst doping agents and cocatalysts;
- Photocatalyst immobilization and support materials;
- Innovations in photocatalytic reactors and photocatalytic fuel cells;
- Experimental, theoretical, process optimization and modeling of photocatalytic processes;
- Development of novel photocatalytic materials.

I am pleased to invite you to submit a manuscript to this Special Issue. Both original research papers and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
