

Special Issue

Green Extraction, Synthesis and Application of Bioactive Components

Message from the Guest Editors

With this Special Issue on “Green Extraction, Synthesis and Application of Bioactive Components”, we aim to attract original research articles and review papers that cover the research on the synthesis and extraction of new bioactive molecules using newly developed or known synthetic procedures and/or green extraction methods, and evaluate their biological properties and their application. Original research articles and reviews are welcome in this Special Issue. Research areas may include (but are not limited to) the following:

- Developing new procedures (green extraction methods or/and synthetic procedures) to obtain bioactive compounds;
- Application of green extraction methods;
- Synthesis of new organic molecules, hybrid molecules;
- Synthesis and biological evaluation of new molecules;
- In silico, in vitro, and in vivo biological evaluation of new and/or known organic compounds;
- Extraction and identification of unknown compounds of different plants.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
