

Special Issue

Emerging Technologies in Solid Waste Recycling and Reuse

Message from the Guest Editors

This Special Issue seeks high-quality research contributions focusing on innovative solutions for waste minimization, resource recovery, and sustainable reuse. We would also highly appreciate literature reviews and state-of-the-art articles. Topics of interest include, but are not limited to, the following:

- Novel recycling processes, biodegradable and recyclable materials;
- Waste valorization strategies;
- Effluent purification processes using waste;
- Development of new materials through the use of waste;
- Smart waste management systems;
- Life cycle assessment (LCA) of recycling technologies;
- Policy frameworks supporting circular economy initiatives;
- Contributions exploring the role of Industry 4.0 technologies, such as IoT, machine learning, and robotics, in optimizing waste recycling and reuse processes;
- Circular economy in waste management.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
