

## Special Issue

# Composites by Metallurgy and Combustion Synthesis

### Message from the Guest Editor

This Special Issue on “Composites by Metallurgy and Combustion Synthesis” aims to cover recent advances in the preparation of composites via powder metallurgy and combustion synthesis. The available topics include, but are not limited to, methods and/or applications in the following areas: the improvement and optimization of related synthesis and processing techniques, ceramic composite processing, metal–ceramic composite processing, intermetallic composite processing, oxide-based composite materials, physical/mechanical property characterization, experimental validation, and other relevant phenomena. Full papers, short communications, and reviews are all welcome.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
