

Special Issue

Current Trends in Anaerobic Digestion Processes, 2nd Edition

Message from the Guest Editors

Given the growing demand for green energy in developed and developing countries, biogas production from biomass and waste is a technology that is used to produce renewable methane. This can be obtained as biogas or biomethane. Different substrates can be used in the anaerobic digestion process, such as energy crops, waste, residual biomass, as well as food waste. Together with these conventional aspects, other innovative technologies have to be developed to purify biogas through fermentation, separation of CO₂, hydrogenation of CO₂, use of biochar in the digester, or biogas purification. This Special Issue on "Current Trends in Anaerobic Digestion Processes, Volume II" aims to curate novel advances in biogas production and use, focusing both on modeling and experimental campaigns. Topics include, but are not limited to, the following:

- Modeling of anaerobic digestion and biogas production;
- Organic substrate characterization and pre-treatment;
- Biogas purification and biomethane production and use;
- Biogas combustion in engines and turbines.

Guest Editors

Dr. Pietro Bartocci

Prof. Dr. Qing Yang

Dr. Francesco Fantozzi

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
