

Special Issue

Chemical Engineering – Environment, Sustainability and the Future

Message from the Guest Editors

The world is changing faster than ever before, and technological advancement is the main driving force. For the successful operation of any industrial process or plant, particularly chemical and process ones, it has become essential to consider the social impacts on environmental and sustainability issues. The articles to be published in this Special Issue are selected articles that will be presented at the International Symposium on Chemical Engineering—Environment, Sustainability and the Future, 22–24 December 2023, to be held at the University College of Science & Technology, Kolkata, India. The International aims to bring together researchers, academicians, professionals, policymakers, scientists, industry delegates, research scholars, and UG/PG students from all over the world under one roof to interact, deliberate, share, and present their research work, ideas, and innovations related to recent advances in environment, energy, sustainability, and advanced materials.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
