

Special Issue

Innovative Drying Technologies for Food Processing

Message from the Guest Editors

In the contemporary food processing industry, innovation in drying technologies is increasingly recognized as a vital means of enhancing food quality, extending shelf life, and reducing energy consumption. This Special Issue aims to gather the latest research findings and industry practices that explore advanced drying technologies and their applications in food processing. Topics covered may include, but are not limited to, the following:

- Novel drying techniques
- Energy efficiency and sustainability
- Food safety and quality
- Smart drying systems
- Case studies and practical applications

This Special Issue invites submissions from academia, industry experts, and research institutions. We encourage contributors to share their latest research results, technological innovations, and practical experiences in the field of drying technologies. Through this platform, we aim to facilitate knowledge exchange and promote ongoing development and innovation in food processing.

Guest Editors

Dr. Tarik Hadibi

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
