Pollution Control and Recycling of Solid Wastes

Message from the Guest Editors

This Special Issue on “Pollution Control and Recycling of Solid Wastes” seeks high-quality studies which focus on the latest novel advances in recovery and harmless treatment technologies for solid waste, as well as control processes or routes for pollutants. Topics include, but are not limited to, the following:

- Industrial solid waste analysis and treatments;
- Functional materials and performance application for solid waste treatments;
- Pollutant control methods and cases studies;
- The treatment and application of municipal solid waste;
- Solid waste recovery and harmless conversion;
- Recovery process industrial integration, application, and modelling;
- Process reengineering;
- Novel processes for producing traditional materials;
- Process digitization.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
