

Special Issue

Measurement and Modelling of Food Processes

Message from the Guest Editors

This Special Issue on “Measurement and modelling of Food Processes” seeks high-quality works focusing on the latest novel advances in food processing technology. Topics include, but are not limited to:

- Spectroscopic measurement systems, image analysis, and process analyzers to enhance the knowledge about food or improve food production;
- Application of chemometric models, PCR, PLSR or neural networks as data-driven modelling tools for food process analysis;
- Mechanistic models used as observers during food processing;
- Industrial application of measurements and modelling for food processing;
- Data evaluation algorithms (e.g., machine learning).

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
