Kinetic Modeling of Biomass Pyrolysis Processes (2nd Edition)

Message from the Guest Editors

The Special Issue on “Kinetic Modeling of Biomass Pyrolysis Processes (2nd Edition)” aims to collect original studies focussed on determining the intrinsic kinetics of general validity for biomass pyrolysis, accounting for the effects of peculiar chemical compositions, catalysts, pre-treatments, etc.

- The topics include, but are not limited to, the following:
- Innovative approaches in kinetic modeling of lignocellulosic materials.
- Thermal degradation kinetics of lignocellulosic biomass macro-components.
- Devolatilization behavior and kinetics of agricultural residues and aquatic biomass.
- Effects of pretreatments on the thermal degradation kinetics of biomass.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
