Fly Ash Utilization, Characterization and Applications

Message from the Guest Editors

This Special Issue, entitled "Fly Ash Utilization, Characterization and Applications", delves into the multifaceted aspects of fly ash to advance scientific knowledge and innovation regarding the efficient utilization and characterization of fly ash, enabling its sustainable incorporation in various applications. The scope of this Special Issue includes, but is not limited to, the following topics:

- The characterization of fly ash for an enhanced understanding of its behavior in various applications;
- Innovative techniques for the extraction and recovery of valuable materials from fly ash;
- The utilization of fly ash in the development of sustainable infrastructure;
- The environmental implications of fly ash utilization and its management;
- The durability and long-term performance of fly-ash-based materials.

I look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
