

## Special Issue

# Advanced Technologies for Carbon Mitigation and Carbon Utilization

### Message from the Guest Editors

Currently, various strategies and solutions have been adopted by various countries for the purpose of eliminating anthropogenic CO<sub>2</sub> emissions. These approaches include the following: improving energy efficiency; using energy sources that are less carbon-intensive (i.e., natural gas, hydrogen, and nuclear power) or renewable (i.e., solar, wind, hydropower, and geothermal and bio-energy); and enhancing biological sinks (i.e., afforestation and reforestation); and CO<sub>2</sub> capture and storage (CCS). This Special Issue aims to compile contributions (in the form of research articles, letters, reviews, and communications) to update developments in the areas of carbon mitigation and utilization in support of future developments in the low-carbon global economy with net carbon emissions and the availability of reagents.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
