

Special Issue

Advances and New Directions of Crystallization Processes

Message from the Guest Editors

Crystallization and precipitation had been used widely over different industries as a separation and purification techniques in food, agricultural, and petrochemical environments, as well as in more laboratory-oriented industries, such as chemical and pharmaceutical, to obtain highly pure products. The actual social transformation from linear to a circular economy approach have posed new challenges where crystallization becomes a key process for success. Due to the demand of high-quality products, new developments on the process designs, modelling and measuring techniques have been done to better control supersaturation and, therefore, nucleation and growth. This Special Issue on “Advances and New Directions of Crystallization Processes” seeks high-quality works focusing on the latest novel advances on crystallization technology. Topics include, but are not limited to: (i) development of novel measuring techniques, (ii) process integration towards lower energy consumption and zero liquid–solid discharge, (iii) urban and water mining for recovery of materials.

Guest Editors

Prof. Dr. Sônia Denise Ferreira Rocha

Dr. Frederico Marques Penha

Dr. Marcos Rodriguez Pascual

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
