Special Issue

Novel Processes for Emerging Contaminants Degradation: Current Research and Future Prospects

Message from the Guest Editors

This Special Issue on "Novel Processes for Emerging Contaminants Degradation: Current Research and Future Prospects" aims to collect new research and studies on highly efficient, advanced technologies that can be used in the degradation of emerging contaminants. Topics include, but are not limited to, the following:

- Diagnostics and critical study of established emerging contaminants degradation methods;
- Development of novel processes for emerging contaminants degradation;
- Design of pelote units using novel methodologies of degradation of emerging contaminants.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
