

Special Issue

Biorefinery and Thermochemical Conversion as Solutions for the Industrial Use of Agro-Industrial Residues

Message from the Guest Editors

This Special Issue delves into the promising domains of biorefinery and thermochemical conversion, two distinct yet interconnected methodologies, as dynamic solutions for harnessing the untapped potential of agro-industrial residues. This special Issue aims to unravel the intricacies of biorefinery and thermochemical conversion, offering a comprehensive understanding of their pivotal roles in shaping the approaches to agro-industrial residue utilization. This Special Issue on “Biorefinery and Thermochemical Conversion as Solutions for the Industrial Use of Agro-Industrial Residues” aims to curate novel advances in the development of the use of agro-industrial Residues as feedstocks for the production of added-value products under the scope of Biorefinery and Thermochemical Conversion. Topics include, but are not limited to: Agro-industrial Residues Valorization; Thermochemical processes; Biomass Conversion; Bio-Based added-value products.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
