

Special Issue

Development of Corrosion-Resistant Materials

Message from the Guest Editors

In this Special Issue, titled “Development of Corrosion-Resistant Materials”, we aim to provide a comprehensive platform for the exchange of innovative research findings, outcomes, and applicable creative solutions on the development and application of corrosion-resistant materials in various emerging renewable energy systems. We are particularly interested in submissions addressing corrosion issues in systems involving thermal, chemical, electrochemical, and hydrogen-based applications. Papers focusing on diverse energy-generation sources such as geothermal, battery, and nuclear energy are also of interest. Authors are invited to submit original research articles and comprehensive reviews that shed light on the topics mentioned above. Each submission will undergo a detailed peer review to ensure the quality and relevance of the content. Together, let us advance fundamental corrosion mechanistic understanding and practical corrosion control strategy development in the realm of clean renewable energy production and application. We look forward to your valuable contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
