

Special Issue

Analysis and Control of New Power System with Multiple Types of Flexible Resources

Message from the Guest Editors

Topics of interest include, but are not limited to, the following:

- Power quality control with energy storage;
- Energy management strategies for energy storage;
- Active coordination control on power grid (voltage support and frequency regulation);
- Power efficiency optimization and improvement methods;
- Topology of new compensation systems;
- Coordination control of multiple types of flexible resources;
- Advanced control strategies of grid power electronic systems;
- Power quality issues of aggregated grid power electronics systems;
- Power regulation applications in T&D.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
