

## Special Issue

# Physico-Mechanical Properties and Characterization of Alkali-Activated Solid Waste Based Cementitious Materials

### Message from the Guest Editors

This Special Issue on “Physico-Mechanical Properties and Characterization of Alkali-Activated Solid Waste Based Cementitious Materials” seeks high-quality works focusing on the latest advances and research trends regarding alkali activation technology towards solid waste utilization. Topics include, but are not limited to:

- Alkali activated newly emerging precursors from solid waste and characterization;
- Alkali activated blends of solid waste and traditional precursors (slag, fly ash, and metakaolin) and performance application;
- Novel alkali activator sources and production;
- Physico-mechanical properties, application and modelling of alkali-activated solid waste based materials.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
