

Special Issue

Current and Future Trends in Chemical Analysis of Food: Techniques and Applications

Message from the Guest Editors

This Special Issue aims to present the current analytical techniques used to analyse food products, their structure and quality. In addition, it focuses on the trends and novel approaches in the field of separation, quantification and characterisation methods for analysing any substance or microorganism in food. The quality of the obtained data is also a vital issue that supports the justification of the legislation or regulations regarding the consumption of food. Due to the complexity of food matrices, the quantification of different compounds requires advanced sample preparation technologies coupled with advanced hyphenate instrumentation. These techniques range from non-invasive and non-destructive techniques, such as spectroscopic techniques, imaging techniques, machine vision, and electronic noses, to emerging areas, such as nanotechnology and biosensors, including those that are already well-established in food analysis, such as chromatographic and electrophoretic techniques, and other tools for solving problems in chemical and biological analysis, such as mass spectrometry and molecular-based techniques.

Guest Editors

Dr. Cristina Almeida

Dr. Cristina Carvalho

Dr. Vasco Branco

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
