Special Issue

Contamination Control and Detection Processes for Chemical Elements in Soil

Message from the Guest Editors

This Special Issue is dedicated to publishing new technologies including green methods to assess soil and plant properties and how chemical elements behave on them. Careful soil management, including monitoring nutrient levels and controlling pollution, is necessary to maintain a healthy and productive soil ecosystem. To manage the quantities of chemical elements in soils, several analytical techniques are commonly used—each with its strengths—depending on the specific element being measured, as well as the sensitivity and the sample type. New technologies using remote and proximal sensors in an IoT (Internet of Things) context are extremely desirable for this Special Issue. Authors are invited to contribute with topics including, but not limited to, the following:

- Baselines of chemical elements in soils:
- How organic matter effects other elements' retention in soils:
- Analytical methods to quantify chemical elements in soil samples:
- Proximal sensors to estimate soil and plant properties;
- Emerging pollutants in soil, including nanomaterials, hormones, pharmaceuticals, and so on.

Guest Editors

Dr. Geila S. Carvalho

Dr. Bruno Teixeira Ribeiro

Dr. Everton Geraldo de Morais

Dr. Cynthia De Oliveira

Deadline for manuscript submissions

30 April 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
