

Special Issue

Advances in Microbial Fuel Cell Technology for Wastewater Treatment and Energy Storage

Message from the Guest Editors

This Special Issue, entitled “Advances in Microbial Fuel Cell Technology for Wastewater Treatment and Energy Storage”, focuses on the application of MFC technology coupled to energy storage solutions. The scope of this Special Issue includes, but is not limited to, methods and/or applications in the following areas:

- MFC technology affiliated with rechargeable energy storage devices;
- MFC technology affiliated with capacitance or super-capacitance devices;
- MFC technology affiliated with any other form of chemical energy storage;
- MFCs used in sensing or environmental monitoring applications;
- Specialized low-power electronic devices operating with MFCs or bio-electrochemical cells.

Guest Editors

Dr. Eustace Y. Fernando

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
