

Special Issue

Design, Modeling and Optimization of Solar Energy Systems

Message from the Guest Editor

This Special Issue, entitled "Design, Modeling, and Optimization of Solar Energy Systems," explores the principles, methodologies, and tools necessary for developing efficient and sustainable solar energy solutions. The focus is on the integration of solar technologies in various applications, utilizing advanced modeling techniques to predict performance, and employing optimization strategies to enhance efficiency and cost effectiveness. This Special Issue welcomes publications highlighting the theoretical foundations of solar energy, practical design considerations, simulation methods, and the latest innovations in optimization algorithms and software for solar energy systems. Our Special Issue will accept a broad range of new advances in the field of solar energy and related renewable sources of energy.

Guest Editor

Dr. Rohit Salgotra

Faculty of Physics and applied computer science, AGH University of Krakow, 30, 30-059 Krakow, Poland

Deadline for manuscript submissions

25 July 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
