

## Special Issue

# Process Research in Thin Film and Coating Technology

### Message from the Guest Editors

This Special Issue is dedicated to “Process Research in Thin Film and Coating Technology”. The aim is to bring together scientists working on the technology of membranes and coatings from several disciplines to further develop new methods and ideas. The topics to be covered include (but are not limited to):

- Polymers, metals, alloys, and composites for membranes and coatings;
- Novel materials for membranes and coatings;
- Synthesis and characterization of membranes and coatings;
- Industrial processes;
- Thermodynamics and transport properties;
- Theory and simulations;
- Applications.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
