

## Special Issue

# Low-Carbon Design and Manufacturing Processes

### Message from the Guest Editors

The goal of this Research Topic is to explore scientific models, methods and technologies that demonstrate both solid theoretical development and practical importance in order to implement low-carbon design and manufacturing. The central theme of the proposed Research Topic is on the low-carbon design and manufacturing processes, where information technology-based modelling, analysis, control and optimization are the focus areas, with broad aspects and issues also being explored. Topics to be covered include, but are not limited to, the following:

- Low-carbon product design method
- Low-carbon manufacturing
- Low-carbon manufacturing process planning
- Low-carbon workshop scheduling
- Low-carbon design method for remanufacturing
- Low-carbon remanufacturing process planning
- Low-carbon logistics
- Low-carbon reverse supply chain

---

### Guest Editors

Prof. Dr. Zhigang Jiang

Dr. Yan Wang

Dr. Chao Ke

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
