Fuzzy Control System: Design and Applications

Message from the Guest Editor

This Special Issue, entitled “Fuzzy Control System: Design and Applications”, seeks to underscore recent progress in leveraging fuzzy logic for better decision-making, enhancing control theory and applications, and refining control processes. By utilizing fuzzy logic, known for its adeptness at managing uncertainty and imprecision, this Issue aims to tackle sophisticated challenges across various fields. The areas of interest for this issue include, but are not limited to, the following:

- Enhancements in strategic decision-making and management through fuzzy logic applications;
- Integration of fuzzy logic into control systems to achieve more adaptive and robust outcomes;
- Theoretical and practical exploration of fuzzy systems within control processes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
