

Special Issue

Recent Achievements in Spectrometric Methods for Multi-element Analysis and Sample Preparation

Message from the Guest Editors

The Special Issue is dedicated to analytical chemists focused on the determination of major, minor, and trace elements in samples with different matrices using spectrometric techniques. Newly developed and validated elemental analysis methods are particularly welcome. Scientific areas to be covered may include (but are not limited to) the following topics:

- i) multi-element analysis of various samples including food, environmental, industrial, or biological materials;
- ii) speciation and/or fractionation of elements using chromatographic and non-chromatographic approaches;
- iii) sample preparation procedures before spectrometric measurements with special attention to alternative, “green”, methodologies;
- iv) improvements in the single and/or simultaneous determination of elements using spectrometric techniques (including hyphenated systems); and
- v) method development, validation, verification, and application to real samples

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
