

Special Issue

Graphene Oxide: From Synthesis to Applications

Message from the Guest Editors

This Special Issue aims at covering recent advances in the development and application of graphene oxide and its composites. Topics include, but are not limited to, the following:

- Synthesis—Contributions providing new insights into GO structure and novel synthesis approaches are welcome.
- Biomedical Applications—Contributions highlighting the functionalization of GO with (bio)molecules for the improvement of its biocompatibility are welcome.
- Membrane Technology—Contributions highlighting the importance of GO structure, morphology, and surface chemistry for tailoring membranes' permeability and selectivity are welcome.
- Composite Materials—Contributions highlighting the benefits of GO in nanocomposites applied in the electronic, aerospace, automotive, construction, and other industries are welcome.
- Energy Storage Devices—Contributions highlighting the importance of GO structure, morphology, surface chemistry, electric, and mechanical properties in energy storage devices are welcome.
- Environmental Remediation—Contributions highlighting the specific importance of GO morphology, surface area, and surface chemistry are welcome.

Guest Editors

Dr. Sonja Jovanović
Dr. Zoran Jovanović
Dr. Zeljko Mravik

Deadline for manuscript submissions

20 February 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
