The Recycling Process of Agro-Industrial Waste

Message from the Guest Editors

This Special Issue on “The Recycling Process of Agro-Industrial Waste” seeks high-quality works focusing on the latest advances in sustainable technologies for the recovery of value-added products from agro-industrial wastes. Topics include, but are not limited to, the following:

- Self-sustainable conversion of agro-industrial waste into biofuels.
- Novel methods for nutrient recovery and organic fertilizer production.
- Valorization of food waste into value-added products and bioenergy.
- Sustainable technologies for agro-industrial waste management (for instance, bioelectrochemical systems, i.e., MFC, CW-MFC, etc.).
- Bioconversion of agricultural waste into bioenergy, such as biogas and bioelectricity.
- Life cycle assessment (LCA) and environmental impact of agro-industrial waste.
- Agro-industry strategies for a circular economy.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
