

## Special Issue

# Supramolecular Hosts: Design and Applications

### Message from the Guest Editors

This Special Issue on “Supramolecular Hosts: Design and Applications” is focused on recent advances in new developments and their applications. Topics include, but are not limited to:

- Development of new catalysts for organic synthesis and industrial processes;
- Biomedical uses and therapeutic strategies—imaging agents and drug carriers;
- Medical devices;
- Integration in green processes;
- Analytical applications involving sensors and separation methods;
- Nano- and biotechnologies—new materials and formulation processes;
- Enzyme mimics—advances in bioorganic chemistry

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
