Anaerobic Digestion of Waste and Valorisation

Message from the Guest Editor

In a circular economy approach, Anaerobic Digestion (AD) is one of the most reliable technologies for the exploitation and valorization of biosubstrates organic content. Although several biomasses can be suited for AD, in this Special Issue attention will be paid to biowastes, such as food waste, sewage sludge, agricultural residues, paper, and cardboard waste. In its most traditional application, AD is applied to produce biogas for green energy generation; however, in a recently identified process referred to as chain elongation, more valuable byproducts, such as medium chained fatty acids, can be obtained, exploiting the ability of the fermentation step to generate electron donors (ethanol and lactate). This Special Issue will address applications focused on enhancing biogas production, as well as chain elongation processes aiming to high value-added byproducts generation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
