

Special Issue

Innovative Materials and Technologies for Pollutants Removal and Green Energy Production and Storage

Message from the Guest Editors

Environmental quality is vital for life and sustainable development, yet urban pollution continues to rise due to human activities, especially in energy production. To meet the pollution prevention desiderata, new solutions for green energy production are envisaged, along with the development of new materials for environmental quality remediation by pollutant removal in a sustainable manner. This special issue invites contributions focused on innovative solutions for pollutant removal and green energy systems to support environmental sustainability. Topics include:

- Advanced technological processes for pollutant removal (air, water, soil)
- Synthesis of emerging materials (biochar, aerogels, graphene-based composites)
- Development of energy production/storage systems (fuel cells, supercapacitors, photovoltaics)
- Process modeling, integration, and optimization
- Terrestrial and space applications with environmental performance focus

Both original research articles and reviews are welcome.

Guest Editors

Dr. Gabriela Soreanu

Prof. Dr. Igor Cretescu

Prof. Dr. Manuel Andrés Rodrigo

Deadline for manuscript submissions

20 July 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
