Adsorption Kinetics and Thermodynamics: Analysis and Applications

Message from the Guest Editors

This Special Issue on “Adsorption Kinetics and Thermodynamics: Analysis and Applications” aims to put together recent advances in adsorption science in various fields. Topics include but are not limited to:

- Adsorption isotherms and thermodynamics in liquid and gas;
- Modeling of adsorption kinetics of gas molecules on metal and metal oxide surfaces;
- Diffusion of adsorbates on solid surfaces;
- Fundamental aspects of heterogeneous catalysis;
- Studies of the atomic layer deposition process;
- Adsorptive removal of hazardous chemicals with porous materials.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
