

Special Issue

Sustainable Supply Chains in Industrial Engineering and Management

Message from the Guest Editors

This Special Issue focuses on the construction and operation of sustainable supply chains in industrial engineering and management. Researchers are encouraged to apply multidisciplinary approaches to their manuscript to promote sustainable efforts in this field. Areas of interest include, but are not limited to, the following:

- The design and coordination of sustainable supply chains;
- Sustainable supply chain design, modeling and optimization;
- The impact of big data on green supply chains;
- Systematic and integrated application of industrial engineering methods;
- Evaluation of sustainable supply chains in industrial engineering;
- The application of multiobjective decision methods in engineering;
- Smart manufacturing process monitoring and control;
- Sustainable strategies of industrial engineering;
- Optimized operation and management of remanufacturing production system;
- Optimization and application of industrial engineering methods.

Guest Editors

Prof. Dr. Conghu Liu

Dr. Xiaoqian Song

Dr. Zhi Liu

Dr. Fangfang Wei

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
