

Special Issue

Advanced Performance-Oriented Evaluation, Diagnosis and Fault-Tolerant Control Techniques for Industrial Processes

Message from the Guest Editors

This Special Issue will focus on advanced performance-oriented evaluation, diagnosis and fault-tolerant control methodologies for complex industrial systems, especially performance monitoring and fault-tolerant control techniques, and machine-learning-related schemes with their industrial applications. We invite original manuscripts presenting recent advances in these fields with special reference to the following topics:

- Data-driven performance monitoring and evaluation techniques.
- Machine-learning-based fault diagnosis and fault-tolerant control techniques.
- Data-driven fault diagnosis techniques.
- Advanced model-based fault diagnosis and fault-tolerant control techniques for complex industrial processes.
- Intelligent fault diagnosis and fault-tolerant control techniques for safety-critical systems.
- Real-time implementation and industrial applications.

Guest Editors

Dr. Xin Peng

Dr. Linlin Li

Prof. Dr. Hao Luo

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
