Special Issue

Multiphase Flow Process and Separation Technology

Message from the Guest Editors

This Special Issue on "Multiphase Flow Process and Separation Technology" mainly concerns research papers on new technologies of multiphase flow and separation equipment, new methods of research, theories of design, etc. Researchers are welcome to submit their papers. It is expected that the research methodology, including the research design, experimental methods, sample selection, and data analysis techniques, should be detailed; the main results should highlight the significance and novelty of the submissions. Topic include, but are not limited to, the following:

- The development of models or simulations or experiments of multiphase processes.
- The development of models or simulations or experiments of separation equipment.
- Design, analysis, optimization, and performance of novel separation technologies.
- Simulation techniques, algorithms, or other tools for modeling and simulation.

Thank you, and I hope you consider participating in this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
