Advanced Simulation and Experiment Methods of Flow Instability in Hydraulic Machinery

Message from the Guest Editors

This Special Issue on “Advanced Simulation and Experimentation Methods of Flow Instability in Hydraulic Machinery” seeks high-quality works focusing on the latest simulation and experiment technology for hydraulic machinery. Topics include but are not limited to:

- Flow instability phenomena in hydraulic machinery;
- Advanced simulation and experimentation methods of hydraulic machinery;
- Optimization design of pump;
- Research on the transition process of hydraulic machinery;
- Internal flow mechanism of hydraulic machinery.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
