# **Special Issue**

# Genetic Engineering: Processes, Methods, Challenges and Solutions

### Message from the Guest Editors

Genetic engineering involves manipulating an organism's genetic material to achieve desired traits or functions. This Special Issue aims to provide a comprehensive overview of the processes, methods, challenges, and solutions in this field. A specific list of potential topics is outlined below. **Processes and Methods** 

- DNA Extraction and Isolation
- Gene Cloning and Design
- Transformation
- Backcross Breeding

### **Applications**

- Agriculture: Developing pest-resistant and highyielding crops.
- Aquaculture: New methods in the genetic breeding of economically important marine and freshwater species.
- Medicine: Producing recombinant proteins for therapeutic purposes.
- Environmental Science: Using engineered microorganisms to degrade pollutants.

#### **Challenges and Solutions**

- Ethical Concerns
- Unintended Consequences
- Regulation and Safety

Future Directions Genetic engineering holds promise for addressing global challenges in agriculture, medicine, and environmental sustainability. This Special Issue invites researchers to submit original research papers, reviews, and perspectives on the processes, methods, challenges, and solutions in genetic engineering.

## **About the Journal**

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
