

Special Issue

Waste Supermaterials: Engineered Multifunctional Composites for Dual Water- Waste Solutions

Message from the Guest Editors

his Special Issue, *Waste Supermaterials: Engineered Multifunctional Composites for Dual Water-Waste Solutions*, will spotlight the latest advancements in the development of multifunctional composite materials derived from waste resources. It will focus on innovative strategies that transform waste into high-performance materials capable of addressing two of the most pressing global challenges: water purification and waste management. By bringing together multidisciplinary research from materials science, environmental engineering, and sustainable chemistry, this Special Issue will provide a comprehensive platform for novel solutions that contribute to cleaner water and a cleaner planet. We look forward to your valuable contributions, which will help us to shape the future of sustainable materials and integrated environmental solutions.

Guest Editors

Dr. Marija Simić

Dr. Jelena Petrović

Dr. Marija Koprivica

Deadline for manuscript submissions

15 February 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
