Special Issue

Sorption-Enhanced Processes in Fluidized Bed Systems

Message from the Guest Editors

Sorption-enhanced (SE) processes can be performed in different types of reactors, such as fixed beds and membrane reactors, but fluidized bed reactors appear to provide some inherent advantages compared to the others. In fact, efficient heat management and easy solid particle circulation allow for safe steady operation and continuous sorbent regeneration in dual fluidized bed systems. This Special Issue is focused on SE processes in fluidized bed systems. Papers dealing with the following topics are welcome:

- Experimental and modeling studies on new SE concepts;
- Studies on conventional SE concepts focused on novel aspects;
- Novel conventional or bi-functional sorbents for fluidized bed SE processes;
- Novel fluidized bed reactors for SE processes;
- Process, techno-economic and environmental performance analysis of SE processes.

Guest Editors

Prof. Dr. Fabrizio Scala

Dipartimento di Ingegneria Chimica, dei Materiali e della Produzione Industriale, Università degli Studi di Napoli Federico II, Naples, Italy

Dr. Antonio Coppola

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
