

Special Issue

Advances of Antimicrobial in Bioengineering

Message from the Guest Editors

Presently, humankind is faced with an urgent need to develop novel and highly effective antimicrobials to control multidrug-resistant microorganisms and infectious outbreaks. Bioengineering is at the forefront as a critical and strategic field of knowledge for the development of innovative antimicrobial compounds and materials with tailored activity, as well as comprising low-propensity to induce microbial resistance. Reports of new bioengineered compounds or materials and the description of their mode of action are essential for the development of novel applications and strategies. Including bioprocess optimization, encompassing improved production methodologies, and advances in the development of applications and antagonistic approaches. This special issue will gather original research and review articles focusing on bioengineered compounds and/or materials depicting the following:

- Superior antimicrobial efficiency;
- Comprehensive characterization of their antimicrobial action;
- Directed or selective action;
- Novel application strategies;
- Bioengineering optimization of the production process.

Guest Editors

Dr. Jorge Padrão

Dr. Andrea Zille

Dr. Helena P. Felgueiras

Dr. Joana C. Antunes

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
