

Special Issue

Advances in Digital Design and Manufacturing

Message from the Guest Editors

The scope of the Special Issue includes advanced digital design and manufacturing processes, methods, tools and technologies, which have potential applications in the following fields (amongst others):

- Smart product design and development;
- Smart service design and development;
- Computer-aided industrial design;
- Modeling and simulation of digital twin platform for smart product design;
- Integrated product and service system design and manufacturing;
- Digital twin and IoT-enabled smart product and manufacturing ecosystem;
- Circular economy approach for smart product and service design and manufacturing smart cities and urbanization;
- Smart healthcare and social cares;
- Smart manufacturing;
- Emotional design and smart society;
- Cultural-inspired product and service design.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
