

## Special Issue

# New Advances in Materials and Procedures for Precision Medicine

### Message from the Guest Editor

The emergence of precision medicine is a major trend in the treatment of human diseases. Precision medicine makes use of the genetic, metabolic, environmental, and other unique features of individual patients to develop and administer treatments most likely to be successful. Precision medicine can also aid in the evaluation of individual patient risks and to prescribe preventative behaviors. The treatment of many other diseases beyond cancer are being subjected to research using precision approaches including diabetes, cardiovascular illness, hypertension, asthma and allergies, and neurological conditions. The achievement of the aims of precision medicine have the potential to greatly improve patient outcomes, reduce chronic disease, and potentially lower overall healthcare costs. This Special Issue will present papers related to recent advances on developing new materials and processes needed to successfully implement precision medicine and bring it towards being a prominent strategy in modern medicine.

### Guest Editor

Prof. Dr. Keith J. Stine

Department of Chemistry and Biochemistry, University of Missouri—Saint Louis, Saint Louis, MO 63121, USA

### Deadline for manuscript submissions

closed (25 November 2023)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
